

File 51: Hyper-Scale 90-Day Sprint & 10-Person Team Scaling Playbook

Strict Scaling Policy: In accordance with executive instructions, **this hyper-scale roadmap operates under our local staging policy.** All recruitment sourcing, structured interview schedules, and 90-day time-blocked hiring pipelines are fully staged and prepared for immediate deployment to scale our team from 1 to 10 people.

I. The Hyper-Scale 90-Day Sprint Roadmap

To take Blue Ridge Stream Restoration from a single-operator startup to a dominant 10-person geomorphic engineering and mitigation capital powerhouse, we establish **The Hyper-Scale 90-Day Sprint**. This roadmap leverages parallel workstreams to compress standard 12-month development timelines into tight, highly accountable 30-day blocks:

1. Days 1–30: The Sourcing Sprint (Target Team: 1 to 3 People)

- **Primary Focus:** Build the transaction engine, secure initial land options, and segment the CRM prospecting pipelines.
- **Hiring Milestones:** Managing Director (Hunter Morris), Sourcing Director, and rotating UGA Warnell GIS Intern.
- **Weekly Sourcing Rhythms:**
 - *Monday Morning CRM Import:* Segment and upload all 1,000 prospects and 100 Large River Tracts into self-hosted Corteza CRM.
 - *15 Sourcing Calls/Day:* Target priority landowners near Hunter's cabin (e.g. Tract **LT-006** Boardtown Creek, **LT-048** Fightingtown Creek).
 - *SEO Outreach:* Send backlink pitches to target Trout chapters (.org) and exurban banking blogs (.com) to establish organic site authority (File 49).
- **Success Target: Five (5) signed 70/30 Landowner Joint-Venture Option Agreements;** live segmented CRM dashboard; completed high-authority do-follow backlink placements.

2. Days 31–60: The Fluvial Engineering Sprint (Target Team: 3 to 6 People)

- **Primary Focus:** Transition from sourcing into high-speed technical permitting and geomorphic Natural Channel Design (NCD).
- **Hiring Milestones:** Onboard Fluvial Engineer (PE), UAS Drone Photogrammetry Specialist, and Restoration Biologist (UGA/GT graduates).
- **Weekly Engineering Rhythms:**
 - *LiDAR Drone Surveys:* Run Mavic 3 Enterprise photogrammetry wades over signed tracts, establishing QGIS NDVI canopy benchmarks.
 - *HEC-RAS 2D Siting:* Model 100-year storm floodway shear stresses ($1.46 \text{ N/m}^2 < \tau < 21.85 \text{ N/m}^2$) to prove gravel stability (File 33).

- *USACE PCN Permitting*: Submit Section 404 Nationwide Permit 27 narratives and DNR trout buffer variances.
- *LinkedIn Video Launch*: Distribute cinematic trout legacy documentaries (File 47) targeting data center ESG managers and developers.
- **Success Target: Three (3) submitted USACE NWP 27 Pre-Construction Notifications**; completed 3D AutoCAD NCD bioengineered designs for J-hook vanes; completed brand video distributions.

3. Days 61–90: The Siting & Capital Sprint (Target Team: 6 to 10 People)

- **Primary Focus**: Scale heavy civil construction, close wholesale credit pre-sales, and formalize board governance.
- **Hiring Milestones**: Onboard instream Grading Foreman, heavy equipment field hand, Office Controller/Bookkeeper, and Clemson Finance Intern.
- **Weekly Operations Rhythms**:
 - *Excavation Grading*: Mobilize John Deere 130G excavators to install toe-wood bank stabilization layers and J-hook riffles.
 - *Wholesale Credit Presales*: Close direct watershed transactions with QTS Data Centers, Microsoft Cloud, and Georgia DOT.
 - *QuickBooks Accounting Sync*: Establish 10% Escrow Working Capital reserves and distribute initial JV splits (File 37).
 - *EOS L10 Board Meetings*: Conduct bi-monthly board accountability cycles utilizing Vern Harnish's *Scaling Up* cash stress-testing models.
- **Success Target: \$500,000+ credit pre-sale contracts executed**; heavy excavators active on two sites; fully synchronized QuickBooks Online chart of accounts; completed first intern rotation.

II. The 10-Person Recruitment & Hiring Funnel

To scale our team with high-caliber talent without burning cash, we establish a **Structured, Non-Union Recruitment Funnel** targeting Georgia's elite academic institutions and specialized grading networks:

1. Recruiting Channels & Target Degrees

1. **Fluvial Engineer PE (Month 2)**: Target Georgia Tech School of Civil & Environmental Engineering (ce.gatech.edu). Look for candidates with 4+ years of HEC-RAS 2D modeling and USACE Section 404 permitting experience.
2. **Restoration Biologist (Month 2)**: Target University of Georgia Warnell School of Forestry & Natural Resources (warnell.uga.edu). Focus on EPA Rapid Bioassessment Protocols (RBP) III and benthic EPT taxonomic index expertise.
3. **Stewardship & Sourcing Interns (Month 1/3)**: Target Clemson Master of Real Estate Development (MRED) and agricultural wealth programs to manage RIBITS market sourcing and bank option agreements.
4. **Instream Grading Foreman (Month 3)**: Recruited directly from local Fannin/Gilmer county heavy civil contracting databases (Yancey Caterpillar logistics reps, forestry clearing foremen).

2. Structured 3-Step Interview Funnel

- **Step 1: Geomorphic Screen (Hunter Morris):** 30-minute phone call assessing alignment with local mountain trout ecosystems and geomorphic conservation values.
- **Step 2: Technical Geomorphic Test:** Candidate is given raw GIS/elevation coordinates of a degraded reach (e.g. Roya's Cabin Boardtown Creek scours) and must calculate the Entrenchment Ratio (*ER*) and recommend J-hook structures within 48 hours.
- **Step 3: Board Alignment (Hunter & Hadi Irvani):** In-person alignment review at the operations office, assessing cultural fit, EOS scorecard metrics, and long-term legacy commitments.

3. Roles and Responsibilities Matrix

Employee ID	Role / Seat	Key Responsibilities	Primary Performance KPI
EM-01	Managing Director (Hunter Morris)	Geomorphic design-build lead; Board relationship banking; direct credit sells.	Project IRR (lge 301%); JV contracts signed.
EM-02	Sourcing Director	Sourcing rural mountain landowner wades; exurban real estate broker relationships.	Landowner options signed (lge 3/month).
EM-03	Fluvial Engineer PE	AutoCAD Civil 3D NCD structure designs; 1D/2D HEC-RAS hydraulic modeling.	USACE PCN permit approvals; zero design errors.
EM-04	Restoration Biologist	Benthic macroinvertebrate sorting; EPA Rapid Bioassessments; EPD variance filings.	Annual RIBITS monitoring reports submitted on-time.
EM-05	UAS Drone Specialist	photogrammetry demo mapping flight paths; GCP placements; WebODM processing.	LiDAR Dem mapping accuracy (lge 98%).
EM-06	instream Grading Foreman	John Deere excavator bankfull grading; toe-wood placement; step-pool installations.	Instream grading execution within budget.
EM-07	Heavy Equipment Field Hand	Silt fence setups; pump-around water bypass installations; cedar root-wad logging.	Worksite safety and GSWCC compliance ratings.
EM-08	Office Controller	QuickBooks Online chart of accounts; Docuseal signatures; Escrow reserves tracking.	Account balancing within 24 hours of close.
EM-09	UGA Warnell Intern	Macroinvertebrate sorting quadrants; HOBO logger temperature readings.	Complete vegetative quadrants surveys (lge 10/week).
EM-10	Clemson Real Estate Intern	RIBITS database audit; exurban land zoning scans; exurban B2B database follow-ups.	Segmented target lead acquisitions (lge 50/week).

III. High-Velocity EOS Scorecards & Alignment Rhythms

To ensure our scaled team operates at peak velocity without misalignments, we implement the **Traction EOS Weekly Alignment Rhythm**:

1. High-Velocity Scorecard Metrics

- **Weekly Sourcing Scorecard**: Track the exact volume of landowner calls (lge 75/week), completed stream walks (lge 5/week), and signed JV options (lge 1/week) to maintain a healthy sourcing pipeline.
- **Weekly Engineering Scorecard**: Track the volume of AutoCAD sheets completed (lge 4/week), LiDAR drone acres processed (lge 100 acres/week), and regulatory submissions (lge 1/month).
- **Weekly Capital & Siting Scorecard**: Track cash runway stress-testing, wholesale pre-sales pipeline (Target: \$250k pending), and Escrow capital allocations (12.5% target balance).

2. High-Velocity Level 10 Board Meeting Agenda (90 Minutes)

1. **The Segue (5 Min)**: Share one personal and one professional win to set a positive, collaborative tone.
2. **The Scorecard (10 Min)**: Review the 10 role-based metrics to ensure all parameters are on-track.
3. **Rock Review (15 Min)**: Check progress on our high-priority 90-day sprint targets (Sign 5 JV options, submit 3 permits, secure pre-sales).
4. **Employee & Customer Headlines (5 Min)**: Share feedback from landowners, brokers, or regulatory inspectors.
5. **To-Do List (5 Min)**: Ensure last week's operational commitments are 100% completed.
6. **IDS - Identify, Discuss, Solve (45 Min)**: Deeply analyze and resolve the week's biggest roadblocks (e.g. a delayed EPD trout buffer variance or an exurban land mortgage bank subordination delay).
7. **Conclude & Rate (5 Min)**: Summarize new To-Dos, define external messaging limits, and rate the meeting on a scale of 1-10 (target: lge 8.5).
