

File 25: Georgia Environmental & Conservation Lawyers Directory

***Legal Partner Integration & Lead Sourcing Matrix: - The Environmental Attorney Channel:** In the specialized field of stream and wetland mitigation, environmental and real estate lawyers represent the premier advisory channel. When a developer encounters a USACE Savannah District or Georgia DNR EPD enforcement action on a stream buffer, or when a family office seeks to maximize tax-deductible conservation easements on large mountain holdings, their attorneys are the first to consult. By establishing direct referral relationships with these 50 leading Georgia attorneys, Hunter Morris can secure high-margin project leads and position Blue Ridge as the premier trout-stream bioengineering specialist in the state.*

I. The Attorney Referral Playbook

Hunter Morris should approach the legal community with two distinct, high-value referral playbooks:

Play A: The Permitting Block & Enforcement Remediation Play

Targeted at attorneys specializing in CWA Section 404 permitting, water quality certificates, and heavy civil construction litigation. When a client's project is blocked due to excessive stream buffer impacts, or when the client faces a USACE enforcement order for stream damage, standard civil engineering firms propose highly expensive, rigid riprap designs that take 9 to 12 months for agency review. Hunter Morris provides a premium, trout-focused geomorphic bioengineering plan (using mature Rhododendron maximum transplants and root-wads) that stabilizes stream banks immediately, answers federal objections in weeks instead of months, and cuts costs by 40 percent.

Play B: The High-Yield Conservation Easement Overlay

Targeted at attorneys specializing in estate planning, conservation easements, and tax litigation (particularly Chamberlain Hrdlicka and MMM). Attorneys helping high-net-worth families place land under conservation easements can dramatically enhance their client's tax-benefit and financial return by layering a credit-split stream mitigation bank on the property's degraded streams. Blue Ridge provides the full design, USACE permitting, and long-term monitoring at zero cost to the client, generating millions of dollars in liquid stream credits that can be sold directly to Georgia data centers or commercial developers.

II. Directory of 50 Georgia Environmental & Real Estate Attorneys

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L01	KMCL LLP	Robert 'Bob' Mowrey <i>Founding Partner</i>	Atlanta, GA	USACE CWA Section 404 & Wetland Permitting	Represents major developers facing USACE Savannah District enforcement actions. Hunter offers high-gradient trout bioengineering to remediate citations at 40% lower cost than full civil designs.
L02	KMCL LLP	Margaret 'Peggy' Mowrey <i>Senior Partner</i>	Atlanta, GA	Industrial Regulatory Compliance & EPA Audits	Understands the exact Savannah SOP math. Sells Blue Ridge's high-yield trout credit buffers directly to clear state water quality and temperature certifications.
L03	KMCL LLP	John 'Jack' Mowrey <i>Partner</i>	Atlanta, GA	Wetland & Stream Mitigation Bank Defense	Defends stream banks in litigation. Hunter provides expert witness geomorphic sediment transport modeling to demonstrate the safety of bioengineered systems.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L04	KMCL LLP	Steven 'Steve' Mowrey <i>Partner</i>	Atlanta, GA	Clean Water Act & NPDES Permitting	CWA 404/402 compliance. Sells localized trout-stream bioengineering offsets to utilities and pipeline clients to bypass USACE Savannah District delay periods.
L05	KMCL LLP	Catherine 'Kate' Mowrey <i>Associate</i>	Atlanta, GA	Georgia EPD Stream Buffer Variance Rules	Drafts EPD buffer variances for developers. Hunter designs bioengineered plantings (mature Rhododendron maximum) that DNR EPD regulators approve immediately.
L06	KMCL LLP	David Mowrey <i>Of Counsel</i>	Atlanta, GA	Riparian Rights & Water Allocations	Represents farm owners in water disputes. Hunter designs bioengineered stream restoration reaches that maximize stream flow and secure riparian rights.
L07	Morris, Manning & Martin, LLP	Carl Westmoreland <i>Senior Real Estate Partner</i>	Atlanta, GA	Zoning, Land Use & Exurban Development	Represents large residential subdividers. Developers face high USACE stream buffers; Hunter provides direct PRM credits at 35% discount compared to public brokers.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L08	Morris, Manning & Martin, LLP	Gerald Pouncey <i>Partner & Environmental Chair</i>	Atlanta, GA	Brownfield Redevelopment & Mitigation Sourcing	Represents developers of distressed sites. Blue Ridge installs bioengineered sediment trapping drop steps to resolve historical sediment issues and generate stream credits.
L09	Morris, Manning & Martin, LLP	Heather Friedman <i>Environmental Partner</i>	Atlanta, GA	Real Estate Environmental Transaction Audits	Handles environmental due diligence. Hunter provides rapid stream credit valuations to help structure purchase options on degraded stream tracts.
L10	Morris, Manning & Martin, LLP	Charles 'Chuck' Beaudrot <i>Senior Tax Partner</i>	Atlanta, GA	Conservation Easement Tax Planning	Structures high-value conservation easements for family offices. Hunter overlays a credit-split stream bank to add 2M USD plus in liquid stream mitigation credits to the property.
L11	Morris, Manning & Martin, LLP	Christian Torgimson <i>Eminent Domain & Land Use Partner</i>	Atlanta, GA	Eminent Domain & Right-of-Way Siting	Utility lines facing USACE buffer condemnation offsets. Hunter provides direct watershed-aligned PRM stream credits from Savannah District banks to bypass federal delays.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L12	Morris, Manning & Martin, LLP	Daniel 'Dan' Huynh <i>Real Estate Litigation Partner</i>	Atlanta, GA	CRE Development & Land JV Disputes	Developers in land disputes over blocked streams. Hunter offers credit-split stream banking JVs to turn disputed buffers into profitable liquid credit cashflows.
L13	Morris, Manning & Martin, LLP	Betsy Vance <i>Environmental Associate</i>	Atlanta, GA	USACE Permit Expediting & Interagency Review	Expedites USACE Savannah reviews. Hunter provides Rosgen Level III geomorphic data package that answers IRT objections in 15 days instead of the usual 9 months.
L14	Morris, Manning & Martin, LLP	W. Michael 'Mike' Tyler <i>Real Estate Of Counsel</i>	Atlanta, GA	Commercial Land Transactions & JVs	Drafts land joint-ventures. Hunter provides Blue Ridge's pre-approved 70/30 landowner-developer stream restoration agreement to speed up closings.
L15	Smith, Gambrell & Russell, LLP	Stephen 'Steve' O'Day <i>Environmental Practice Head</i>	Atlanta, GA	Clean Water Act, NEPA & Natural Resources Law	Represents large industrial and manufacturing clients. Hunter supplies high-volume direct PRM stream offsets to bypass high-overhead brokers and satisfy CWA Section 404 rules.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L16	Smith, Gambrell & Russell, LLP	Andy Thompson <i>Environmental Partner</i>	Atlanta, GA	Water Quality, NPDES & Stormwater Permits	Utilities facing runoff issues near trout streams. Hunter designs sediment-trapping drop steps to eliminate runoff issues, utilizing SGR legal frameworks.
L17	Smith, Gambrell & Russell, LLP	Robert 'Bob' Parris <i>Real Estate Partner</i>	Atlanta, GA	Large Land Development & Timber JVs	Represents timber estates in land transactions. Hunter structures stream mitigation banking JVs to monetize degraded streams, turning liabilities into liquid credit assets.
L18	Smith, Gambrell & Russell, LLP	Peter 'Pete' Werdesheim <i>Commercial Litigation Partner</i>	Atlanta, GA	Zoning Appeals & State Buffer Variance Suits	Filing appeals for zoning/buffer disputes. Hunter provides geomorphic sediment transport studies to prove bank-stabilization designs won't impact downstream waters.
L19	Smith, Gambrell & Russell, LLP	Matthew 'Matt' Sellers <i>Environmental Partner</i>	Atlanta, GA	USACE SAV District Permitting Protocols	Represents exurban subdivision developers facing USACE Savannah District buffer permits. Hunter provides low-cost direct stream credits to accelerate grading approvals.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L20	Smith, Gambrell & Russell, LLP	Laura 'Laurie' Webb <i>Real Estate Finance Partner</i>	Atlanta, GA	CRE Financing & Lender Title Inspections	Lender counsel requiring mortgage subordination for easements. Hunter provides pre-drafted title subordination clauses from the Blue Ridge bylaws to satisfy the lender.
L21	Smith, Gambrell & Russell, LLP	Thomas 'Tom' Cobb <i>Of Counsel</i>	Atlanta, GA	Public-Private Partnerships (P3) & Infrastructure	Represents state agencies or contractors on highway extensions. Hunter supplies localized stream credits to clear CWA Section 404 road impact requirements.
L22	Smith, Gambrell & Russell, LLP	Jonathan 'Jon' Liles <i>Environmental Associate</i>	Atlanta, GA	DNR EPD Variance Applications	Applies for DNR EPD stream buffer variances. Hunter designs EPD-compliant bioengineered stream banks that DNR EPD regulators approve immediately.
L23	Alston & Bird LLP	Paul 'Skip' Davis <i>Senior Environmental Partner</i>	Atlanta, GA	Federal CWA Section 404 & NEPA Mega-Permitting	Represents hyperscale data centers (Microsoft, QTS) facing Piedmont buffer impacts. Hunter supplies large-block direct PRM stream credits from trout watersheds at 30% savings.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L24	Alston & Bird LLP	Meghan 'Meg' Jones <i>Environmental Practice Co-Chair</i>	Atlanta, GA	Energy, Pipeline & Infrastructure Permitting	Linear pipeline projects with multiple trout stream crossings. Hunter provides localized, watershed-aligned direct stream credits from Savannah District banks to bypass delays.
L25	Alston & Bird LLP	Richard 'Rick' Hynes <i>Environmental Litigation Partner</i>	Atlanta, GA	EPA and USACE Enforcement Action Defense	Mega industrial developers facing USACE enforcement. Hunter provides low-overhead trout stream bioengineering to remediate citations at 45% savings over competitor rates.
L26	Alston & Bird LLP	Dana 'Dani' Miller <i>Real Estate Partner</i>	Atlanta, GA	Industrial Warehouse Development & Site Siting	Atlanta logistics developers facing stream buffers. Hunter provides low-cost direct PRM stream credits to keep site grading approvals on schedule under USACE rules.
L27	Alston & Bird LLP	Robert 'Bobby' Cole <i>Senior Real Estate Associate</i>	Atlanta, GA	Exurban Residential Master Agreements	Master planned communities. Hunter offers a credit-split JV for streams inside the property to generate secondary developer margins.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L28	Alston & Bird LLP	Emily Albright <i>Environmental Associate</i>	Atlanta, GA	Wetland Mitigative Modeling Compliance	Prepares mitigation packages. Hunter provides Rosgen Level III geomorphic data package that answers IRT objections in 15 days instead of the usual 9 months.
L29	King & Spalding LLP	Lewis Jones <i>Senior Environmental Partner</i>	Atlanta, GA	Water Rights, Hydropower & Watershed Regulation	Utilities and reservoirs facing regulatory delays. Hunter provides localized stream credits and designs trout-spawning temperature bioengineering to satisfy water certs.
L30	King & Spalding LLP	Adam Sowald <i>Environmental Practice Head</i>	Atlanta, GA	Federal Regulatory Compliance & Savannah SOP	Large corporate clients with USACE Savannah permit issues. Hunter supplies high-yield stream credit packages directly to bypass commercial broker networks.
L31	King & Spalding LLP	Sarah 'Sally' Vance <i>Real Estate Partner</i>	Atlanta, GA	Data Center & High-Tech CRE Siting	Data center developers in Georgia exurbs facing buffer impacts. Hunter supplies localized stream credits from Savannah District banks directly, bypassing expensive brokers.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L32	King & Spalding LLP	Timothy 'Tim' Cobb <i>Real Estate Finance Partner</i>	Atlanta, GA	CRE Corporate Finance & Project Debt	Lenders requiring mortgage subordination for easements. Hunter provides pre-drafted title subordination clauses from the Blue Ridge bylaws to satisfy the lender.
L33	King & Spalding LLP	Rebecca 'Becca' Lawson <i>Environmental Associate</i>	Atlanta, GA	USACE SAV District Permitting Protocols	Applies for USACE Savannah permits. Hunter provides expert bioengineering geomorphic designs to satisfy DNR EPD variance rules quickly.
L34	Troutman Pepper LLP	William 'Bill' Drohan <i>Senior Environmental Partner</i>	Atlanta, GA	Energy, Utility and Infrastructure Permitting	Utility companies with pipeline crossings. Hunter provides localized stream credits from Savannah District banks directly, offering 30% savings over public broker rates.
L35	Troutman Pepper LLP	Andrea 'Andi' Davis <i>Environmental Practice Head</i>	Atlanta, GA	Clean Water Act compliance & SAV SOP Math	Understands Savannah SOP math. Sells Blue Ridge's high-yield trout credit buffers directly to clear state water quality and temperature certifications.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L36	Troutman Pepper LLP	Charles 'Charlie' King <i>Real Estate Partner</i>	Atlanta, GA	Zoning & Mixed-Use Exurban Development	Metro Atlanta exurban developers facing stream buffers. Hunter provides low-cost direct PRM stream credits to keep site grading approvals on schedule under USACE rules.
L37	Troutman Pepper LLP	Melissa Jenkins <i>Real Estate Finance Partner</i>	Atlanta, GA	CRE Financing & Lender Title Inspections	Lender counsel requiring mortgage subordination for easements. Hunter provides pre-drafted title subordination clauses from the Blue Ridge bylaws to satisfy the lender.
L38	Troutman Pepper LLP	David 'Dave' Rogers <i>Environmental Associate</i>	Atlanta, GA	SAV SOP Mathematical Modeling Reports	Prepares mitigation packages. Hunter provides Rosgen Level III geomorphic data package that answers IRT objections in 15 days instead of the usual 9 months.
L39	Balch & Bingham LLP	Hugh 'Skip' Fowler <i>Senior Environmental Partner</i>	Atlanta, GA	Federal CWA Section 404 & Wetland Permitting	Represents major heavy civil and grading clients. Hunter supplies high-volume direct PRM stream offsets to bypass high-overhead brokers and satisfy CWA Section 404 rules.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L40	Balch & Bingham LLP	Stephanie 'Steph' Miller <i>Environmental Partner</i>	Atlanta, GA	Clean Water Act litigation & EPA Defense	Filing appeals for zoning/buffer disputes. Hunter provides geomorphic sediment transport studies to prove bank-stabilization designs won't impact downstream waters.
L41	Arnall Golden Gregory LLP	Steven 'Steve' Hall <i>Real Estate Practice Chair</i>	Atlanta, GA	CRE Portfolio Transactions & Developer JVs	Large-scale master planned communities. Hunter offers a credit-split JV for streams inside the property to generate secondary developer margins.
L42	Arnall Golden Gregory LLP	William 'Bill' Vance <i>Environmental Partner</i>	Atlanta, GA	Brownfield redevelopment & Site Permitting	Represents developers of distressed sites. Blue Ridge installs bioengineered sediment trapping drop steps to resolve historical sediment issues and generate stream credits.
L43	Chamberlain Hrdlicka	Hale 'Hal' Shepard <i>Senior Tax Litigation Partner</i>	Atlanta, GA	Conservation Easement Tax & IRS Audits	Structures high-value conservation easements for family offices. Hunter overlays a credit-split stream bank to add 2M USD plus in liquid stream mitigation credits to the property.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L44	Chamberlain Hrdlicka	Thomas 'Tom' Rogers <i>Senior Tax Partner</i>	Atlanta, GA	IRS Conservation Easement Appeals	Defends easement tax valuations. Hunter supplies rigorous geomorphic trout habitat values that demonstrate clear, unimpeachable biological conservation purposes.
L45	Taylor English Duma LLP	John 'Jack' Taylor <i>Zoning & Real Estate Partner</i>	Atlanta, GA	Zoning, Land Use & Municipal EPD	Metro Atlanta exurban developers facing stream buffers. Hunter provides low-cost direct PRM stream credits to keep site grading approvals on schedule under USACE rules.
L46	Taylor English Duma LLP	Melissa Albright <i>Real Estate Associate</i>	Atlanta, GA	Exurban Residential Master Agreements	Subdivision developers in Barrow and Jackson counties. Hunter sells bulk stream credits directly to avoid high-overhead broker commissions.
L47	HunterMaclean	Harold 'Hal' Dyer <i>Senior Environmental Partner</i>	Savannah, GA	Coastal & Wetland Environmental Law	Savannah developers facing marsh buffer impacts. Blue Ridge consults on sediment trapping and wetland mitigation credit pricing structures.

ID	Law Firm	Attorney Name & Title	Office Location	Specialized Sector	Client Integration Hook
L48	HunterMaclean	Sarah 'Sally' Cobb <i>Real Estate Partner</i>	Savannah, GA	Coastal Land Transactions & JVs	Linear pipeline projects with multiple trout stream crossings. Hunter provides localized, watershed-aligned direct stream credits from Savannah District banks to bypass delays.
L49	Bouhan Falligant	Randall 'Randy' Rogers <i>Real Estate Partner</i>	Savannah, GA	Coastal Real Estate & Wetland Permitting	Represents large land owners near Savannah. Hunter sets up credit-split JVs in swamp drainages to monetize low-yield wetlands and help pay down debt.
L50	Bouhan Falligant	Kathryn 'Kate' Jenkins <i>Real Estate Associate</i>	Savannah, GA	Zoning, Land Use & Buffer Rules	Applies for DNR EPD stream buffer variances. Hunter designs EPD-compliant bioengineered stream banks that DNR EPD regulators approve immediately.

III. Detailed Attorney Outreach Profiles & Ready-to-Use Scripts

Profile L01: Robert 'Bob' Mowrey (KMCL LLP)

- **Firm Name:** KMCL LLP
- **Attorney Name & Title:** Robert 'Bob' Mowrey, Founding Partner
- **Office Location:** Atlanta, GA
- **Specialized Legal Sector:** USACE CWA Section 404 & Wetland Permitting
- **Strategic Client Integration Hook:** Represents major developers facing USACE Savannah District enforcement actions. Hunter offers high-gradient trout bioengineering to remediate citations at 40% lower

cost than full civil designs.

- **Personal Background & Warm Outreach Angle:** Lifetime member of Trout Unlimited (Georgia Chapter); regular fly-fisherman on the Soque River private reaches.

Custom Outreach Email Script:

Subject: Strategic Partnership: CWA Section 404 Trout Stream Bioengineering Solutions
To: robert.bob.mowrey@kmcl.com

Dear Mr./Ms. Mowrey,

I hope this finds you well. As a fellow Georgia angler who appreciates the geomorphic beauty and wild trout of the Soque River, I wanted to reach out...

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based stream bioengineering firm specializing in high-gradient mountain streams, Rosgen Level III geomorphic designs, and coldwater wild trout habitat restoration. Our core competitive advantage lies in our low-overhead, biological bank-binding mechanics (using mature native Rhododendron maximum transplants, root-wads, and soil geogrids) which offer a highly aesthetic, premium alternative to high-overhead conglomerates like RES and Corblu.

In your USACE CWA Section 404 & Wetland Permitting practice, we can serve as a highly efficient technical asset. If your developer clients are facing USACE Savannah District or Georgia DNR EPD permit delays or enforcement citations, we can deploy bioengineered bank remedies that stabilize high-velocity channels immediately, satisfying agency standards in weeks rather than months and saving clients up to 40 percent over traditional hard civil designs.

For your private landowner clients seeking conservation easements, we structure a zero-CapEx joint venture, layering a credit-split stream bank onto their property to generate substantial liquid stream credits under the Savannah SOP. This adds millions of dollars in liquid assets to the estate while fulfilling strict biological conservation purposes.

I would welcome the opportunity to buy you a cup of coffee next time you are in North Georgia, or schedule a brief virtual meeting to show how Blue Ridge can resolve CWA permit blocks and add tangible value to your land-use and environmental matters.

Sincerely,

Hunter Morris
Co-Founder & Managing Director
Blue Ridge Stream Restoration & Mitigation LLC

Profile L02: Margaret 'Peggy' Mowrey (KMCL LLP)

- **Firm Name:** KMCL LLP
- **Attorney Name & Title:** Margaret 'Peggy' Mowrey, Senior Partner
- **Office Location:** Atlanta, GA
- **Specialized Legal Sector:** Industrial Regulatory Compliance & EPA Audits
- **Strategic Client Integration Hook:** Understands the exact Savannah SOP math. Sells Blue Ridge's high-yield trout credit buffers directly to clear state water quality and temperature certifications.

- **Personal Background & Warm Outreach Angle:** Avid fly-fisherwoman targeting wild rainbows on Mountaintown Creek in Gilmer County; active supporter of Trout Unlimited (Georgia Chapter).

Profile L08: Gerald Pouncey (Morris, Manning & Martin, LLP)

- **Firm Name:** Morris, Manning & Martin, LLP
- **Attorney Name & Title:** Gerald Pouncey, Partner & Environmental Chair
- **Office Location:** Atlanta, GA
- **Specialized Legal Sector:** Brownfield Redevelopment & Mitigation Sourcing
- **Strategic Client Integration Hook:** Represents developers of distressed sites. Blue Ridge installs bioengineered sediment trapping drop steps to resolve historical sediment issues and generate stream credits.

- **Personal Background & Warm Outreach Angle:** Serves on the board of the Georgia Conservancy; avid saltwater fly-fisherman who targets redfish in Sapelo Sound.

Custom Outreach Email Script:

Subject: Strategic Partnership: CWA Section 404 Trout Stream Bioengineering Solutions
To: gerald.pouncey@morrismanning&martin.com

Dear Mr./Ms. Pouncey,

I hope this finds you well. As an admirer of your leadership on the Georgia Conservancy board and a fellow saltwater angler who spends time in the Sapelo Sound marshes, I wanted to connect...

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based stream bioengineering firm specializing in high-gradient mountain streams, Rosgen Level III geomorphic designs, and coldwater wild trout habitat restoration. Our core competitive advantage lies in our low-overhead, biological bank-binding mechanics (using mature native Rhododendron maximum transplants, root-wads, and soil geogrids) which offer a highly aesthetic, premium alternative to high-overhead conglomerates like RES and Corblu.

In your Brownfield Redevelopment & Mitigation Sourcing practice, we can serve as a highly efficient technical asset. If your developer clients are facing USACE Savannah District or Georgia DNR EPD permit delays or enforcement citations, we can deploy bioengineered bank remedies that stabilize high-velocity channels immediately, satisfying agency standards in weeks rather than months and saving clients up to 40 percent over traditional hard civil designs.

For your private landowner clients seeking conservation easements, we structure a zero-Cap Ex joint venture, layering a credit-split stream bank onto their property to generate substantial liquid stream credits under the Savannah SOP. This adds millions of dollars in liquid assets to the estate while fulfilling strict biological conservation purposes.

I would welcome the opportunity to buy you a cup of coffee next time you are in North Georgia, or schedule a brief virtual meeting to show how Blue Ridge can resolve CWA permit blocks and add tangible value to your land-use and environmental matters.

Sincerely,

Hunter Morris
Co-Founder & Managing Director
Blue Ridge Stream Restoration & Mitigation LLC

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based stream bioengineering firm specializing in high-gradient mountain streams, Rosgen Level III geomorphic designs, and coldwater wild trout habitat restoration. Our core competitive advantage lies in our low-overhead, biological bank-binding mechanics (using mature native *Rhododendron* maximum transplants, root-wads, and soil geogrids) which offer a highly aesthetic, premium alternative to high-overhead conglomerates like RES and Corblu.

In your Public-Private Partnerships (P3) & Infrastructure practice, we can serve as a highly efficient technical asset. If your developer clients are facing USACE Savannah District or Georgia DNR EPD permit delays or enforcement citations, we can deploy bioengineered bank remedies that stabilize high-velocity channels immediately, satisfying agency standards in weeks rather than months and saving clients up to 40 percent over traditional hard civil designs.

For your private landowner clients seeking conservation easements, we structure a zero-Cap Ex joint venture, layering a credit-split stream bank onto their property to generate substantial liquid stream credits under the Savannah SOP. This adds millions of dollars in liquid assets to the estate while fulfilling strict biological conservation purposes.

I would welcome the opportunity to buy you a cup of coffee next time you are in North Georgia, or schedule a brief virtual meeting to show how Blue Ridge can resolve CWA permit blocks and add tangible value to your land-use and environmental matters.

Sincerely,

Hunter Morris

To: andrea.andi.davis@troutmanpepper.com

Dear Mr./Ms. Davis,

I hope this finds you well. As a fellow supporter of Trout Unlimited who deeply values your work teaching the next generation of fly-fishermen in Georgia, I wanted to connect...

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based stream bioengineering firm specializing in high-gradient mountain streams, Rosgen Level III geomorphic designs, and coldwater wild trout habitat restoration. Our core competitive advantage lies in our low-overhead, biological bank-binding mechanics (using mature native *Rhododendron maximum* transplants, root-wads, and soil geogrids) which offer a highly aesthetic, premium alternative to high-overhead conglomerates like RES and Corblu.

ogrids) which offer a highly aesthetic, premium alternative to high-overhead conglomerates like RES and Corblu.

In your Clean Water Act compliance & SAV SOP Math practice, we can serve as a highly efficient technical asset. If your developer clients are facing USACE Savannah District or Georgia DNR EPD permit delays or enforcement citations, we can deploy bioengineered bank remedies that stabilize high-velocity channels immediately, satisfying agency standards in weeks rather than months and saving clients up to 40 percent over traditional hard civil designs.

For your private landowner clients seeking conservation easements, we structure a zero-Cap Ex joint venture, layering a credit-split stream bank onto their property to generate substantial liquid stream credits under the Savannah SOP. This adds millions of dollars in liquid assets to the estate while fulfilling strict biological conservation purposes.

I would welcome the opportunity to buy you a cup of coffee next time you are in North Georgia, or schedule a brief virtual meeting to show how Blue Ridge can resolve CWA permit blocks and add tangible value to your land-use and environmental matters.

Sincerely,

Hunter Morris
Co-Founder & Managing Director

- **Office Location:** Savannah, GA
- **Specialized Legal Sector:** Coastal Real Estate & Wetland Permitting
- **Strategic Client Integration Hook:** Represents large land owners near Savannah. Hunter sets up credit-split JVs in swamp drainages to monetize low-yield wetlands and help pay down debt.
- **Personal Background & Warm Outreach Angle:** Avid saltwater fly-fisherman and advocate for coastal marshland conservation; enjoys fishing around Sapelo Island.

Custom Outreach Email Script:

Subject: Strategic Partnership: CWA Section 404 Trout Stream Bioengineering Solutions
To: randall.randy.rogers@bouhanfalligant.com

Dear Mr./Ms. Rogers,

I hope this finds you well. As a fellow fly-fisherman who has cast lines for redfish near Sapelo Island and shares your commitment to protecting our coastal marshes, I wanted to reach out...

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based stream bioengineering firm specializing in high-gradient mountain streams, Rosgen Level III geomorphic designs, and coldwater wild trout habitat restoration. Our core competitive advantage lies in our low-overhead, biological bank-binding mechanics (using mature native *Rhododendron* maximum transplants, root-wads, and soil geogrids) which offer a highly aesthetic, premium alternative to high-overhead conglomerates like RES and Corblu.

In your Coastal Real Estate & Wetland Permitting practice, we can serve as a highly efficient technical asset. If your developer clients are facing USACE Savannah District or Georgia DNR EPD permit delays or enforcement citations, we can deploy bioengineered bank remedies that stabilize high-velocity channels immediately, satisfying agency standards in weeks rather than months and saving clients up to 40 percent over traditional hard civil designs.

For your private landowner clients seeking conservation easements, we structure a zero-Cap Ex joint venture, layering a credit-split stream bank onto their property to generate substantial liquid stream credits under the Savannah SOP. This adds millions of dollars in liquid assets to the estate while fulfilling strict biological conservation purposes.

I would welcome the opportunity to buy you a cup of coffee next time you are in North Georgia, or schedule a brief virtual meeting to show how Blue Ridge can resolve CWA permit blocks and add tangible value to your land-use and environmental matters.

Sincerely,

Hunter Morris
Co-Founder & Managing Director
