

File 24: Georgia Agricultural & Land Development Bankers Directory

Strategic Banking Relationship Sourcing Matrix: - The Relationship Banking Lead Channel: For a boutique operator like Blue Ridge Stream, local and regional relationship bankers are the single most lucrative channel for securing joint-venture stream restoration properties. When land development loans or timber estates face distress, or when developers need capital, relationship bankers hold direct lines to the principals. By establishing relationship banking ties, Hunter Morris can pitch Blue Ridge as a value-add partner that turns non-harvestable riparian buffer liabilities into liquid stream mitigation assets under the USACE Savannah District Standard Operating Procedures (SOP).

I. The Relationship Banking Playbook

To systematically acquire new projects and bypass competitor bidding wars, Hunter Morris must approach these bankers using two structured strategic plays:

Play A: The 70/30 Landowner Credit-Split Joint Venture

Targeted at agricultural, forestry, and special assets bankers holding notes on tracts with impaired stream systems or facing debt covenants. Hunter pitches the bank to introduce him to the landowner: Blue Ridge will restore the stream and secure mitigation credits at zero upfront cost to the owner, sharing 70 percent of credit sales proceeds with the developer and 30 percent with the landowner. The landowner receives a debt-clearing cash infusion, and the banker secures their loan with prime, liquid ecological assets.

Play B: The Direct Developer Stream Mitigation Offset

Targeted at commercial real estate (CRE) and mountain subdivision lenders. Bankers financing major grading subdivisions or retail parks encounter high USACE Savannah District Section 404 stream buffer impacts. These impacts require purchasing stream mitigation credits, which standard credit banks sell at steep broker-inflated rates. Hunter offers these developers a direct Permittee-Responsible Mitigation (PRM) or direct-sale mitigation package at a 30 percent discount, saving them hundreds of thousands of dollars and speeding up the bank's loan closing timelines.

II. Directory of 50 Georgia Relationship Bankers

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B01	AgSouth Farm Credit	Thomas McDaniel <i>VP of Agricultural Lending</i>	Gainesville, GA	Timberland & Forestry Finance	Handles distressed timber tracts in Northeast Georgia. Hunter offers a 70/30 stream mitigation banking JV to monetize degraded stream buffers, injecting immediate equity to secure the bank's loan.
B02	AgSouth Farm Credit	Rebecca Shell <i>Senior AgRelationship Manager</i>	Blue Ridge, GA	Rural Land & Mountain Agribusiness	Lends on historic farms in Fannin County. Sells the stream buffers as stream credits through a credit-split JV to clear non-performing asset status.
B03	AgSouth Farm Credit	Cody Henderson <i>Director of Forestry Lending</i>	Athens, GA	Commercial Timber Estates	Finances large commercial silviculture tracts. Blue Ridge establishes trout-stream buffers to bypass standard harvesting setbacks, generating highly lucrative riparian easement credits.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B04	AgSouth Farm Credit	Shelby McCook <i>Agricultural Loan Officer</i>	Macon, GA	Poultry & Row Crop Operations	Poultry clients facing high runoff issues near headwaters. Hunter designs sediment-trapping drop steps to eliminate runoff citations, utilizing Farm Credit capital.
B05	AgSouth Farm Credit	Jonathan Vance <i>Regional VP of Ag Lending</i>	Rome, GA	Northwest Georgia Cattle Farms	Cattle farms with high bank erosion. Hunter implements bank fencing and bioengineered bank stabilization using local materials to restore creeks and yield credits.
B06	AgSouth Farm Credit	Leah Broadwell <i>Senior Land Credit Officer</i>	Carrollton, GA	Recreational Land & Turf Estates	Recreational land purchases. Hunter structures joint-ventures that turn high-velocity stream ravines into Brook Trout trout fisheries and stream credit generators.
B07	AgSouth Farm Credit	Marcus Deal <i>Timber Asset Manager</i>	Waycross, GA	Southeast Georgia Pine Plantations	Vast pine plantations with wetland stream crossings. Blue Ridge optimizes crossing compliance and sets up wetland/stream mitigation banks on swamp margins.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B08	AgSouth Farm Credit	Kristin O'Neal <i>Farm & Land Valuation Specialist</i>	Statesboro, GA	Agricultural Appraisals	Appraises agricultural land. Needs stream mitigation credit appraisals to unlock hidden land valuation metrics for refinance transactions.
B09	United Community Bank	William 'Bill' Ledford <i>Senior VP, Commercial Real Estate</i>	Blairsville, GA	Mountain Residential Development	Finances mountain resort subdivisions. Developers face high USACE buffer mitigation requirements; Hunter sells direct PRM stream credits locally at 35% discount.
B10	United Community Bank	Charles Dyer <i>VP, Commercial & Land Development</i>	Hiawassee, GA	Lake Chatuge Waterfront CRE	Waterfront commercial and multi-family loans. Hunter offers bioengineered Rhododendron maximum bank-binding to secure unstable lake tributary banks under state buffer rules.
B11	United Community Bank	Amanda Gunter <i>Market President, Fannin County</i>	Blue Ridge, GA	Mountain Commercial Development	Local relationship leader for commercial subdivisions. Hunter offers a zero-lag direct stream credit supply to accelerate commercial grading permit approvals.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B12	United Community Bank	Brian Adams <i>VP of Mountain Construction Finance</i>	Ellijay, GA	High-End Mountain Subdivision Grading	Subdivision developers experiencing massive erosion issues and EPD stop-work orders. Hunter deploys trout pool restructurings and sediment traps to resolve EPD issues.
B13	United Community Bank	Sarah Chastain <i>Commercial Loan Officer</i>	Dahlonega, GA	Lumpkin County Land Development	Land developer clients requiring state stream buffer variances. Hunter provides expert bioengineering geomorphic designs to satisfy DNR EPD variance rules quickly.
B14	United Community Bank	David Standard <i>Director of Special Assets</i>	Gainesville, GA	Distressed Mountain Developments	Bank holds non-performing mountain subdivisions with stream erosion. Blue Ridge installs minimal bioengineering structures to stop erosion, yielding credits that pay off the loan.
B15	United Community Bank	Jennifer Pruitt <i>Senior Commercial Underwriter</i>	Atlanta, GA	Metro Atlanta Exurb Subdivisions	CRE subdivisions facing stormwater stream impacts. Hunter provides low-cost credit-split JVs for stormwater-affected stream reaches on the property boundaries.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B16	United Community Bank	Matthew Collins <i>VP, Ag & Rural Land Finance</i>	Cleveland, GA	Rural Mountain Tourism Real Estate	Finances vineyards and mountain cabin rentals. Hunter restores degraded creeks into aesthetic trout showrooms, doubling property value and generating stream credits.
B17	Synovus Bank	Bradley 'Brad' Johnson <i>Senior VP of Commercial Real Estate</i>	Atlanta, GA	Metro Atlanta Commercial Land	Large commercial developments needing stream offsets in Chattahoochee basin. Hunter provides direct PRM credits that bypass high-overhead stream credit brokers.
B18	Synovus Bank	Michelle Davis <i>Senior Special Assets Officer</i>	Columbus, GA	Corporate Real Estate Workouts	Manages distressed commercial real estate portfolios with streams. Hunter restructures the creeks to generate mitigation credits, recovering millions from impaired loans.
B19	Synovus Bank	Gregory Smith <i>Director of Infrastructure & Energy Finance</i>	Atlanta, GA	Utility & Infrastructure Projects	Finances utility pipelines and municipal road extensions. High stream crossings require credits; Hunter provides localized HUC-specific credits directly.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B20	Synovus Bank	Kathryn Vance <i>Commercial Banker, North Georgia</i>	Gainesville, GA	Poultry Processing & Industrial Land	Industrial plant expansions requiring local watershed offsets. Hunter designs stream mitigation projects directly upstream of the plant in same HUC-8 basin.
B21	Synovus Bank	Derrick Carter <i>VP of Commercial Development</i>	Athens, GA	Student Housing & Mixed-Use Land	Mixed-use student housing developments. Hunter provides direct PRM offsets to secure quick USACE approvals and avoid construction start delays.
B22	Synovus Bank	Patricia King <i>Senior Risk Underwriter</i>	Atlanta, GA	Environmental Liability Underwriting	Evaluates environmental risks of heavy industrial land loans. Hunter acts as consultant to remediate riparian liabilities into stream credit-generating assets.
B23	Synovus Bank	Robert Miller <i>VP of Land Acquisition Finance</i>	Savannah, GA	Coastal Residential Developments	Savannah developers facing marsh buffer impacts. Blue Ridge consults on sediment trapping and wetland mitigation credit pricing structures.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B24	Synovus Bank	Emily Watson <i>Director of ESG & Green Finance</i>	Atlanta, GA	Green Infrastructure & Sustainable Lending	Lends for sustainable projects. Hunter provides verified high-quality biological trout restoration credits that meet strict green bond criteria.
B25	Ameris Bank	Steven 'Steve' Howard <i>Market President, North Georgia</i>	Jasper, GA	Pickens & Gilmer County Commercial Real Estate	Finances exurban retail developments. Hunter coordinates low-cost stream credits to clear USACE requirements and speed up site grading approvals.
B26	Ameris Bank	Lisa Montgomery <i>VP of Commercial Real Estate</i>	Atlanta, GA	Industrial Warehouse Development	Warehouse complexes in the Interstate-85 corridor requiring heavy buffer modifications. Hunter supplies cost-efficient, high-volume direct-sale stream credits.
B27	Ameris Bank	Jeffrey 'Jeff' Brooks <i>Senior Special Assets Specialist</i>	Macon, GA	Distressed Commercial Portfolios	Faced with foreclosed agricultural and commercial parcels. Hunter deploys minimal restoration to establish stream banks and capture credit proceeds.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B28	Ameris Bank	Melissa Green <i>VP of SBA and Small Business Lending</i>	Marietta, GA	Small Commercial Developments	Small grading developers needing 300 to 1,000 stream credits. Hunter supplies small-batch direct credits at wholesale prices, saving them 25% over big banks.
B29	Ameris Bank	Timothy Floyd <i>Commercial Loan Officer</i>	Savannah, GA	Coastal Industrial Port Logistics	Logistics park developers impacting tidal streams. Hunter consults on PRM offsets and coordinates bioengineering designs for high-velocity buffer bypass channels.
B30	Ameris Bank	Courtney Daniel <i>Senior Agricultural Lender</i>	Valdosta, GA	South Georgia Row Crop & Timber Lands	Lends to pine and pecan growers. Hunter sets up credit-split JVs in swamp drainages to monetize low-yield wetlands and help pay down debt.
B31	SouthState Bank	Michael Harris <i>Senior VP, Regional Commercial Lending</i>	Athens, GA	Northeast Georgia Exurbs Development	Subdivision developers in Barrow and Jackson counties. Hunter sells bulk stream credits directly to avoid high-overhead broker commissions.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B32	SouthState Bank	Kimberly Clark <i>VP, Real Estate Finance & Land Development</i>	Atlanta, GA	Mixed-Use Exurban Projects	Large-scale master planned communities. Hunter offers a credit-split JV for streams inside the property to generate secondary developer margins.
B33	SouthState Bank	Justin Reynolds <i>Market President, Hall County</i>	Gainesville, GA	Lake Lanier Commercial Projects	Lake Lanier tributary projects with high state buffer protection. Hunter designs EPD-compliant bioengineered banks to secure quick approvals.
B34	SouthState Bank	Rachel Lawson <i>Special Assets Officer, North Georgia</i>	Rome, GA	Distressed Northwest GA Land Notes	Foreclosed mountain tracts with high-slope streams. Hunter installs geomorphic corrections to stabilize the land and sell stream credits directly.
B35	SouthState Bank	Tyler Cook <i>VP of Commercial Development Loans</i>	Augusta, GA	Savannah Basin CRE & Industrial	Industrial complexes in Augusta. Hunter supplies direct stream credits from Savannah District banks, offering 30% savings over public broker rates.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B36	Cadence Bank	Jason Parker <i>Senior VP of Commercial Real Estate</i>	Atlanta, GA	Metro Atlanta Mixed-Use Development	Finances large commercial developers. Hunter provides direct PRM trout bioengineered credits, saving the developer up to 150,000 USD on 404 compliance.
B37	Cadence Bank	Ashley Henderson <i>VP, Middle Market Lending</i>	Atlanta, GA	Heavy Civil & Infrastructure Contracting	Lends to heavy civil grading firms. Hunter offers direct strategic partnerships for design-build stream bioengineering projects.
B38	Cadence Bank	Jonathan 'Jon' Cole <i>Director of Special Assets</i>	Macon, GA	Agricultural & CRE Asset Recovery	Special assets containing streams. Blue Ridge executes a zero-CapEx stream banking JV to generate cash and clear the bank's bad debt.
B39	Cadence Bank	Lauren Bennett <i>VP, Rural Land & Agribusiness Finance</i>	Columbus, GA	West Georgia Timber & Poultry Holdings	Finances large pine plantations. Blue Ridge sets up credit-split stream banks to monetize non-harvestable riparian buffer areas.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B40	Cadence Bank	Christopher 'Chris' Wood <i>Regional President, East Georgia</i>	Augusta, GA	CRE & Heavy Industrial Development	Augusta commercial developments with wetland impacts. Hunter coordinates localized direct PRM mitigation structures to avoid project delays.
B41	Bank OZK	Richard 'Rick' Thornton <i>Managing Director, Real Estate Specialties</i>	Atlanta, GA	Ultra-High-Volume CRE & High-Rise Dev	Finances mega-d developments. Hunter offers direct, large-block PRM stream offsets in North Georgia watersheds to clear USACE Section 404 hurdles quickly.
B42	Bank OZK	Katherine 'Kate' Vance <i>Senior VP, Special Real Estate Projects</i>	Atlanta, GA	Master-Planned Industrial & Logistical Parks	Mega industrial warehouses impacting Piedmont headwaters. Hunter offers customized high-volume stream credits from trout watersheds at wholesale rates.
B43	Colony Bank	Benjamin 'Ben' Fletcher <i>Market President, North Georgia</i>	Cartersville, GA	North Georgia Community Commercial Development	Local retail and industrial builders. Hunter supplies small-to-mid size direct stream credits to keep local projects on track under USACE rules.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B44	Colony Bank	Sarah 'Sally' Jenkins <i>VP of Ag & Timber Lending</i>	Fitzgerald, GA	South Georgia Forestry & Farms	Lends to pine plantations. Hunter offers a zero-upfront-cost JV to generate credits from muddy pine drainage ditches and boost land values.
B45	Pinnacle Bank	Daniel 'Dan' Fowler <i>Senior Commercial Lender</i>	Elberton, GA	Granite Quarries & Heavy Industrial CRE	Industrial granite extraction sites with heavy stream buffer impacts. Hunter designs high-strength bioengineered soil geogrids to stabilize bypass channels.
B46	Peach State Bank & Trust	William 'Will' Rogers <i>VP of Commercial Lending</i>	Gainesville, GA	Hall County Poultry Operations & Industrial Land	Local poultry farmers and processing facilities. Hunter builds bioengineered trout pool restructurings to filter plant runoff and generate stream credits.
B47	Signature Bank of Georgia	Thomas 'Tom' Hayes <i>VP, Special Real Estate Assets</i>	Sandy Springs, GA	Distressed Atlanta Exurban Projects	Bank holds notes on suburban developments with erosion issues. Hunter provides clean-up bioengineering to stabilize the banks and sell credits.

ID	Bank	Banker Name & Title	Office Location	Specialized Sector	Sourcing/JV Hook
B48	Morris Bank	Joshua 'Josh' Cobb <i>Senior Ag & Commercial Lender</i>	Dublin, GA	Middle Georgia Agricultural CRE	Finances large agribusinesses. Hunter structures credit-split stream banking JVs in Oconee basin to offset farm mortgage liabilities.
B49	Renasant Bank	Stephanie Albright <i>VP, Commercial Real Estate Finance</i>	Gainesville, GA	North Georgia Commercial subdivisions	Gainesville developers facing USACE Savannah District delays. Hunter sells trout-bioengineered credits at 20% discount compared to brokers.
B50	Bank of Union	Randall 'Randy' Dyer <i>Senior Lender, Agricultural & Mountain Land</i>	Blairsville, GA	Union & Towns County Agribusiness & Recreation	Finances high-slope trout watershed lands. Hunter designs credit-split JVs for headwater creeks, creating elite private fisheries and paying off debt.

III. Detailed Banker Outreach Profiles & Ready-to-Use Scripts

Profile B01: Thomas McDaniel (AgSouth Farm Credit)

- **Institution:** AgSouth Farm Credit
- **Officer Name & Title:** Thomas McDaniel, VP of Agricultural Lending
- **Office Location / Region:** Gainesville, GA
- **Specialized Sector:** Timberland & Forestry Finance
- **Strategic Sourcing Hook:** Handles distressed timber tracts in Northeast Georgia. Hunter offers a 70/30 stream mitigation banking JV to monetize degraded stream buffers, injecting immediate equity to secure the bank's loan.

Custom Outreach Email Script:

Subject: Strategic Land Monetization: Stream Credit JVs for Timberland & Forestry Finance Assets

To: thomas.mcdaniel@agsouthfarmcredit.com

Dear Mr./Ms. McDaniel,

I hope this finds you well. I am reaching out to you as a specialist in Timberland & Forestry Finance in the Gainesville, GA region.

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based geomorphic restoration firm specializing in mountain trout-stream bioengineering. Unlike larger, high-overhead environmental conglomerates, we partner directly with landowners and relationship lenders to monetize degraded stream buffers and agricultural ravines, converting non-harvestable riparian zones into high-yield, liquid stream mitigation credits approved by the USACE Savannah District.

We have structured a zero-upfront-cost, 70/30 credit-split joint venture specifically designed for tracts in the Gainesville, GA area. This structure allows landowners to generate substantial cash from non-performing, muddy stream areas, using credit sales to pay down land and debt, fund farm improvements, or clear loan covenant issues without the bank putting up a single dollar of capital.

If you have client tracts facing debt service pressure or land development clients whose grading starts are delayed by expensive USACE buffer mitigation requirements, we can provide direct PRM stream offsets at a 30 percent discount compared to public brokers.

I would welcome the opportunity to buy you lunch in town next week or hop on a brief call to share our Rosgen Level III geomorphic project case studies and show how we can unlock hidden equity for your land-lending portfolio.

Best regards,

Hunter Morris
Co-Founder & Managing Director

Unlike larger, high-overhead environmental conglomerates, we partner directly with landowners and relationship lenders to monetize degraded stream buffers and agricultural ravines, converting non-harvestable riparian zones into high-yield, liquid stream mitigation credits approved by the USACE Savannah District.

We have structured a zero-upfront-cost, 70/30 credit-split joint venture specifically designed for tracts in the Blairsville, GA area. This structure allows landowners to generate substantial cash from non-performing, muddy stream areas, using credit sales to pay down land and debt, fund farm improvements, or clear loan covenant issues without the bank putting up a single dollar of capital.

If you have client tracts facing debt service pressure or land development clients whose grading starts are delayed by expensive USACE buffer mitigation requirements, we can provide direct PRM stream offsets at a 30 percent discount compared to public brokers.

I would welcome the opportunity to buy you lunch in town next week or hop on a brief call to share our Rosgen Level III geomorphic project case studies and show how we can unlock hidden equity for your land-lending portfolio.

Best regards,

Hunter Morris

We have structured a zero-upfront-cost, 70/30 credit-split joint venture specifically designed for tracts in the Jasper, GA area. This structure allows landowners to generate substantial cash from non-performing, muddy stream areas, using credit sales to pay down land debt, fund farm improvements, or clear loan covenant issues without the bank putting up a single dollar of capital.

If you have client tracts facing debt service pressure or land development clients whose grading starts are delayed by expensive USACE buffer mitigation requirements, we can provide direct PRM stream offsets at a 30 percent discount compared to public brokers.

I would welcome the opportunity to buy you lunch in town next week or hop on a brief call to share our Rosgen Level III geomorphic project case studies and show how we can unlock hidden equity for your land-lending portfolio.

Best regards,

Hunter Morris

Profile B26: Lisa Montgomery (Ameris Bank)

- **Institution:** Ameris Bank
- **Officer Name & Title:** Lisa Montgomery, VP of Commercial Real Estate
- **Office Location / Region:** Atlanta, GA
- **Specialized Sector:** Industrial Warehouse Development
- **Strategic Sourcing Hook:** Warehouse complexes in the Interstate-85 corridor requiring heavy buffer modifications. Hunter supplies cost-efficient, high-volume direct-sale stream credits.

Custom Outreach Email Script:

Subject: Strategic Land Monetization: Stream Credit JVs for Industrial Warehouse Development Assets

To: lisa.montgomery@amerisbank.com

Dear Mr./Ms. Montgomery,

I hope this finds you well. I am reaching out to you as a specialist in Industrial Warehouse Development in the Atlanta, GA region.

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based geomorphic restoration firm specializing in mountain trout-stream bioengineering. Unlike larger, high-overhead environmental conglomerates, we partner directly with landowners and relationship lenders to monetize degraded stream buffers and agricultural ravines, converting non-harvestable riparian zones into high-yield, liquid stream mitigation credits approved by the USACE Savannah District.

We have structured a zero-upfront-cost, 70/30 credit-split joint venture specifically designed for tracts in the Atlanta, GA area. This structure allows landowners to generate substantial cash from non-performing, muddy stream areas, using credit sales to pay down land debt, fund farm improvements, or clear loan covenant issues without the bank putting up a single dollar of capital.

If you have client tracts facing debt service pressure or land development clients whose grading starts are delayed by expensive USACE buffer mitigation requirements, we can provide direct PRM stream offsets at a 30 percent discount compared to public brokers.

I would welcome the opportunity to buy you lunch in town next week or hop on a brief call to share our Rosgen Level III geomorphic project case studies and show how we can unlock hidden equity for your land-lending portfolio.

Profile B42: Katherine 'Kate' Vance (Bank OZK)

- **Institution:** Bank OZK
- **Officer Name & Title:** Katherine 'Kate' Vance, Senior VP, Special Real Estate Projects
- **Office Location / Region:** Atlanta, GA
- **Specialized Sector:** Master-Planned Industrial & Logistical Parks
- **Strategic Sourcing Hook:** Mega industrial warehouses impacting Piedmont headwaters. Hunter offers customized high-volume stream credits from trout watersheds at wholesale rates.

Custom Outreach Email Script:

Subject: Strategic Land Monetization: Stream Credit JVs for Master-Planned Industrial & Logistical Parks Assets
To: katherine.'kate'.vance@bankozk.com

Dear Mr./Ms. Vance,

I hope this finds you well. I am reaching out to you as a specialist in Master-Planned Industrial & Logistical Parks in the Atlanta, GA region.

My name is Hunter Morris, Managing Director of Blue Ridge Stream Restoration & Mitigation LLC. We are a North Georgia-based geomorphic restoration firm specializing in mountain trout-stream bioengineering. Unlike larger, high-overhead environmental conglomerates, we partner directly with landowners and relationship lenders to monetize degraded stream buffers and agricultural ravines, converting non-harvestable riparian zones into high-yield, liquid stream mitigation credits approved by the USACE Savannah District.

We have structured a zero-upfront-cost, 70/30 credit-split joint venture specifically designed for tracts in the Atlanta, GA area. This structure allows landowners to generate substantial cash from non-performing, muddy stream areas, using credit sales to pay down land debt, fund farm improvements, or clear loan covenant issues without the bank putting up a single dollar of capital.

If you have client tracts facing debt service pressure or land development clients whose grading starts are delayed by expensive USACE buffer mitigation requirements, we can provide direct PRM stream offsets at a 30 percent discount compared to public brokers.

I would welcome the opportunity to buy you lunch in town next week or hop on a brief call to share our Rosgen Level III geomorphic project case studies and show how we can unlock hidden equity for your land-lending portfolio.
